SECTION 4. First aid measures

Description of first aid measures

- Inhalation	: Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Apply artificial respiration if breathing stopped.
- Skin contact	: Adverse effects not expected from this product.
- Eye contact	: Adverse effects not expected from this product.
- Ingestion	: Ingestion is not considered a potential route of exposure.
Most important symptoms a	and effects, both acute and delayed
	 In high concentrations may cause asphyxiation. Symptoms may include loss of mobility/ consciousness. Victim may not be aware of asphyxiation. Refer to section 11.
Indication of any immediate	e medical attention and special treatment needed

: None.

SECTION 5. Fire-fighting measures

	Exting	uishir	ng med	lia
--	--------	--------	--------	-----

- Suitable extinguishing media	: All known extinguishants can be used.
Special hazards arising from the sul	bstance or mixture
Specific hazards	: Exposure to fire may cause containers to rupture/explode.
Hazardous combustion products	: High temperature may liberate toxic gases.
Advice for fire-fighters	
Specific methods	 Coordinate fire measure to the surrounding fire. Cool endangered containers with water spray jet from a protected position. Do not empty contaminated fire water into drains. If possible, stop flow of product.
Special protective equipment for fire fighters	: In confined space use self-contained breathing apparatus.

SECTION 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

	 Evacuate area. Try to stop release. Ensure adequate air ventilation. Wear self-contained breathing apparatus when entering area unless atmosphere is proved to be safe. Monitor concentration of released product.
Environmental precautions	
	: Try to stop release.
Methods and material for containme	ent and cleaning up
	: Ventilate area.
Reference to other sections	
	: See also sections 8 and 13.

SECTION 7. Handling and storage

Precautions for safe handling

r rooudione for ouro nununing	
Safe use of the product	 Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Only experienced and properly instructed persons should handle gases under pressure. The product must be handled in accordance with good industrial hygiene and safety procedures. Do not smoke while handling product. Ensure the complete gas system was (or is regularily) checked for leaks before use.
Safe handling of the gas receptacle	 Refer to supplier's container handling instructions. Do not allow backfeed into the container. Protect cylinders from physical damage; do not drag, roll, slide or drop. When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders. Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use. If user experiences any difficulty operating cylinder valve discontinue use and contact supplier. Never attempt to repair or modify container valves or safety relief devices. Damaged valves should be reported immediately to the supplier. Keep container valve outlets clean and free from contaminates particularly oil and water. Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment. Close container valve after each use and when empty, even if still connected to equipment. Never attempt to transfer gases from one cylinder/container to another. Never use direct flame or electrical heating devices to raise the pressure of a container. Do not remove or deface labels provided by the supplier for the identification of the cylinder

SECTION 7. Handling and storage (continued)

contents.

Conditions for safe storage, including any incompatibilities

Keep away from combustible materials.
 Keep container below 50°C in a well ventilated place.
 Observe all regulations and local requirements regarding storage of containers.
 Containers should not be stored in conditions likely to encourage corrosion.
 Containers should be stored in the vertical position and properly secured to prevent toppling.
 Stored containers should be periodically checked for general condition and leakage.
 Container valve guards or caps should be in place.
 Store containers in location free from fire risk and away from sources of heat and ignition.

Specific end use(s)

: None.

SECTION 8. Exposure controls/personal protection

Control parameters

Occupational Exposure Limits	
Carbon monoxide	: TLV© -TWA [ppm] : 25
	: ILV (EU) - 8 H - [ppm]:20
	:ILV (EU) - 15 min - [mg/m³]:117
	:ILV (EU) - 15 min - [ppm]:100
	: ILV (EU) - 8 H - [mg/m³] : 23
Propane	: TLV© -TWA [ppm] : 2500
DNEL: Derived no effect level	: None available.
PNEC: Predicted no effect concentration	: None available.
Exposure controls	
Appropriate engineering controls	 Provide adequate general and local exhaust ventilation. Ensure exposure is below occupational exposure limits (where available). Product to be handled in a closed system and under strictly controlled conditions. Preferably use only permanent leak-tight installations (e.g. welded pipes). Alarm detectors should be used when toxic gases may be released. Systems under pressure shoud be regularily checked for leakages. Consider work permit system e.g. for maintenance activities.
Individual protection measures, e.g. personal protective equipment	 A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk. The following recommendations should be considered. Wear safety glasses with side shields Wear leather safety gloves and safety shoes when handling cylinders.
Environmental exposure controls	: Refer to local regulations for restriction of emissions to the atmosphere. See section 13 for specific methods for waste gas treatment.

SECTION 9. Physical and chemical properties

Information on basic physical and chemical properties

Appearance	
- Physical state at 20°C / 101.3kPa	: Gas.
- Colour	: Colourless.
Odour	: Odourless.
Odour threshold	: Odour threshold is subjective and inadequate to warn for overexposure.
pH value	: Not applicable for gas-mixtures.
Molar mass [g/mol]	: Not applicable for gases and gas-mixtures.
